

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A polycarbonate resin composition comprising:

(A) 5 to 98 parts by weight of a polycarbonate-polyorganosiloxane copolymer,

(B) 0 to 93 parts by weight of a polycarbonate resin,

(C) 2 to 50 parts by weight of titanium oxide,

(D) 0 to 1.0 parts by weight of a fibril-forming polytetrafluoroethylene, and

(E) 0.05 to 2.0 parts by weight of an ~~organosiloxane~~ alkylhydrogensilicone or an alkoxysilicone, wherein

the sum of the ingredients (A), (B), and (C) is 100 parts by weight.

Claim 2 (Original): The polycarbonate resin composition according to claim 1, wherein the ratio of the polyorganosiloxane part in the polycarbonate-polyorganosiloxane copolymer of ingredient (A) to the sum of the ingredients (A) and (B) is 0.3 to 10% by weight.

Claim 3 (Previously Presented): The polycarbonate resin composition according to claim 1, wherein the polyorganosiloxane in the polycarbonate-polyorganosiloxane copolymer of ingredient (A) is polydimethylsiloxane.

Claim 4 (Previously Presented): The polycarbonate resin composition according to claim 1, wherein the surface acid content of the titanium oxide of ingredient (C) is 10 $\mu\text{mol/g}$ or more.

Claim 5 (Previously Presented): The polycarbonate resin composition according to claim 1, wherein the surface base content of the titanium oxide of ingredient (C) is 10 $\mu\text{mol/g}$ or more.

Claims 6-7 (Canceled).

Claim 8 (Currently Amended): The polycarbonate resin composition according to claim ~~[[7]]~~ 1, wherein ~~the organosiloxane~~ of ingredient (E) is an alkoxysilicone, which is an organopolysiloxane with a molecular structure in which an alkoxy group bonds to a silicone main chain through a methylene group.

Claim 9 (Original): A polycarbonate resin molding obtained by molding of the polycarbonate resin composition according to claim 1.

Claim 10 (Original): The polycarbonate resin molding according to claim 9, wherein the molding is a plate, a sheet, a film, or a molding obtained by thermomolding or pressmolding thereof.

Claim 11 (Original): The polycarbonate resin molding according to claim 9, wherein the molding is a molding obtained by injection-molding.

Claim 12 (Previously Presented): The polycarbonate resin molding according to claim 9, wherein the molding is a light reflector.

Claim 13 (Original): The polycarbonate resin molding according to claim 12, wherein a reflectance (Y value) of the polycarbonate resin composition composing the light reflector is 93 or more and a total light transmittance thereof (wall thickness: 1 mm) is 0.6 or less.

Claim 14 (Original): The polycarbonate resin molding according to claim 13, wherein a product $A \times B$ is 150 or more, wherein A (in the unit of nm) is the surface roughness Ra of the light reflector measured through intermittent contact with an AFM (atomic force microscope) and B (in the unit of g) is the titanium oxide content thereof.

Claim 15 (Currently Amended): The polycarbonate resin composition according to claim [[7]] 1, wherein ~~the organosiloxane~~ of ingredient (E) is an alkylhydrogensilicone.

Claim 16 (Currently Amended): The polycarbonate resin composition according to claim [[7]] 1, wherein ~~the organosiloxane~~ of ingredient (E) is an alkoxysilicone, which contains an alkoxysilyl group wherein alkoxy is bonded directly or through a divalent hydrocarbon group to a silicon atom.

Claim 17 (Previously Presented): The polycarbonate resin composition according to claim 16, wherein the alkoxysilicone is a linear organopolysiloxane.

DISCUSSION OF THE AMENDMENT

Claim 1 has been amended by incorporated the subject matter of Claim 7 therein;
Claims 6 and 7 have been canceled. Claims 8, 15 and 16 have been amended to be consistent
with the amendment to Claim 1.

No new matter is believed to have been added by the above amendment. With entry
thereof, Claims 1-5 and 8-17 will be pending in the application.
